

Goal: To examine how reported occurrences of river otters has changed since the year 1900.

Data Source: <https://nbnatlas.org/>

Results:

Coefficients:

	Estimate	Std. Error	Z value	Pr(> z)
(Intercept)	-6.1881386	0.5202444	-11.89	<2e-16
Year	0.0031213	0.0002591	12.05	<2e-16

Null deviance: 21997 on 63513 degrees of freedom

Residual deviance: 21847 on 63512 degrees of freedom

P-value of Chi-square -> 0.000000

Conclusion: We can see from the results that year has a highly significant effect on the occurrences of eurasian otter, with otter occurrence reports increasing drastically
